DETAILED ACTION

This is the third office action for U.S. Application 10/542,346 for a Holder for Heat Exchanger filed on July 14, 2005.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 29, 2009 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 20-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 20, Applicant claims, "end faces which are arranged parallel to one another, and side faces", then claims, "wherein one of the two clamping elements comprises latching arms which are configured to engage over the side faces. However, it is not clear what the side faces of the pipe/rib block are and how the latching arms engage over it. Applicant identifies the end faces of the pipe/rib

block 19 as 19A and 19B and identifies a side part 21 and flat pipes 20. For examination purposes, it is assumed that Applicant is referring to the side part, though there is only one side part identified by Applicant.

Allowable Subject Matter

Claim 20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. Claims 21-27 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 20-27 have been considered but are moot in view of the new ground(s) of rejection. Applicant also argues that claims 1 and 12 only add additional limitations to the interaction of the holder and heat exchanger. However, the additional limitations amount to a positive recitation of the pipe/rib block of the heat exchanger.
